## Profile

---

UI/UX designer and passionate Flutter developer with expertise creating engaging user experiences for online and mobile platforms. I have a strong grasp of developing mobile apps with the Flutter framework and an excellent sense of design aesthetics.

## Experience

---

Yeab Future

Internship

- My primary responsibility revolves around web design, particularly focusing on a project for Kebena House. My work involves various tasks such as designing layouts, selecting visual elements and optimizing user experience.

Rdx

Internship

- In this company where I'm learning a bunch of cool stuff about UI/UX design. I'm getting hands-on experience with tools like Figma, learning about typography, playing around with prototype colors, and understanding how to make things user-friendly.

## Personal Projects

---

- Teraki mobile app

I created an app using Flutter and Firebase. This app helps people read PDFs and listen to audio books online. With Flutter, I built the app itself, making it work smoothly on different devices.

- Felagi mobile app

I created a mobile app right on campus! Using Flutter and Bloc state management, I built the front-end part of the app. It's super handy for students on campus. They can check out notices on the notice board and even find lost items through this platform.

## Education

---

Addis Ababa university  
Software engineering

2020-2025
